SUBJECT INDEX

Absorption spectroscopy
  absorption spectrophotometric and X-ray diffraction studies of the trihalides of promethium in the solid state, 275
Aluminium
  atomic distribution of alloying additions between sublattices in the intermetallic compounds Ni_3Al and NiAl
  II: microscopic calculations and X-ray diffraction analysis, 191
  solid solubility of rare earths in aluminium, 213
  structure-sensitive magnetic properties of YFe_6Al_6, 321
  tritium diffusion and trapping associated with lithium in Al–Li systems, 169
Amorphous alloys
  amorphous Ni–Zr powders by milling the crystalline alloys, 93
Antimony
  phase diagram of the Pr–Sb system, L23

Borate
  liquidus surfaces of the $KF–B_2O_3–Li_2WO_4$, $KF–B_2O_3–Na_2WO_4$ and $KF–B_2O_3–K_2WO_4$ systems, 55
Boron
  neodymium-rich phases in Nd–Fe–B magnets, 217
  study of the influence of titanium on the Nd–Fe–Co–B magnetic phase by Mössbauer spectroscopic measurements between 100 and 650 K, 83

Carbide
  electron irradiation induced disordering of short-range ordered (Ti, Mo)C_x carbide, 309
  note on the formation and the magnetic properties of the compound $Nd_2Fe_{14}C$, L15
  short-range order in a (Ti, Mo)C_x carbide due to the metal–metal interaction, 235
Chemical vapour deposition
  TiB_2 coatings on phosphor bronze plates by CVD and their properties, 327
Chromium
  diffusion paths and phase equilibria in the Mo–Ni–Cr system at 1425 K, 225
Coatings
  TiB_2 coatings on phosphor bronze plates by CVD and their properties, 327
Cobalt
  a novel pattern of condensed tricapped trigonal prismatic clusters for $M_2Ta_{11}Se_8$ (M = Fe, Co, Ni), 59
  study of the influence of titanium on the Nd–Fe–Co–B magnetic phase by Mössbauer spectroscopic measurements between 100 and 650 K, 83
Copper
  structural phase transitions in $YCu_{1-x}M$ (M = Ni, Ag and Ga), 29
Crystal structure
  investigation of the crystal structure of YNi_2, L1
  the crystal structure of $ScTaN_{1-x}$, 157

Deuterium site occupancy
  calculation of deuterium site occupancy in $LaNi_5D_{6.5}$, $LaNi_4AlD_{4.8}$ and $LaNi_4MnD_{5.9}$, 163
Diborides
  thermal expansion studies on the group IV–VII transition metal diborides, 145
Disordering
  electron irradiation induced disordering of short-range ordered (Ti, Mo)C_x carbide, 309
Dysprosium
  pressure effect on magnetic transformations in RE_2 In (RE = Gd, Tb, Dy, Ho), L5

© Elsevier Sequoia/Printed in The Netherlands

Electron irradiation
electron irradiation induced disordering of short-range ordered (Ti, Mo)C_x carbide, 309
Electronic structure
electronic structure of magnesium containing various alloying elements, 295
Erbium
the thermodynamics of the $ErFe_2$–H system using differential heat conduction calorimetry, 103

Films
internal stress in growing TiO_2 films, 335

Gadolinium
pressure effect on magnetic transformations in RE_2In (RE = Gd, Tb, Dy, Ho), L5
Gallium
structural phase transitions in $YCu_{1-x}M_x$ (M = Ni, Ag and Ga), 29
Gold
low temperature properties of the new Heusler phase $UInAu_2$: magnetic to non-magnetic transition in (U, Y)$InAu_2$ and (U, Th)$InAu_2$, 121
on the structure types of UAu_2 and $U_{14}Au_{51}$, 261
on the topologies of $(M_{13})_{13}$ superclusters of ruthenium, rhodium and gold, 137
the solidus and liquidus lines in the Au–Ni phase diagram, L19

Heusler phases
low temperature properties of the new Heusler phase $UInAu_2$: magnetic to non-magnetic transition in (U, Y)$InAu_2$ and (U, Th)$InAu_2$, 121
Holmium
pressure effect on magnetic transformations in RE_2In (RE = Gd, Tb, Dy, Ho), L5
surface oxidation of holmium: UV photoelectron spectroscopy, X-ray photoelectron spectroscopy and scanning electron microscopy studies, 1

Hydrides
hydride formation and phase relations in the Yb–H system: a critical re-examination, 201
low-frequency internal friction study of Zr–H and Zr–D alloys, 285
low-temperature specific heat of f.c.c. ytterbium hydrides, 207
study of the heat and mass transfer characteristics of metal hydride beds, 37
Hydrogen
pressure–concentration isotherms of PdH_x thin films up to 0.2 GPa of gaseous hydrogen, 73
the thermodynamics of the $ErFe_2$–H system using differential heat conduction calorimetry, 103
thermotransport of hydrogen in niobium and tantalum as a function of concentration, 249

Indium
low temperature properties of the new Heusler phase $UInAu_2$ magnetic to non-magnetic transition in (U, Y)$InAu_2$ and (U, Th)$InAu_2$, 121
pressure effect on magnetic transformations in RE_2In (RE = Gd, Tb, Dy, Ho), L5
Intermetallics
atomic distribution of alloying additions between sublattices in the intermetallic compounds Ni_3Al and NiAl
II: microscopic calculations and X-ray diffraction analysis, 191
Iridium
thermodynamic properties of solid Ir–Sn alloys, 11
Iron
a novel pattern of condensed tricapped trigonal prismatic clusters for $M_2Ta_{11}Se_8$ (M = Fe, Co, Ni), 59
note on the formation and the magnetic properties of the compound $Nd_2Fe_{14}C$, L15
nuclear magnetic resonance and magnetization studies in $Ti_4Fe_2O_{0.4}H_x$, 177
on the neodymium-rich phases in Nd–Fe–B magnets, 217
structure-sensitive magnetic properties of YFe_6Al_6, 321

study of the influence of titanium on the Nd–Fe–Co–B magnetic phase by Mössbauer spectroscopic measurements between 100 and 650 K, 83
the thermodynamics of the $ErFe_2$–H system using differential heat conduction calorimetry, 103

Lanthanum
calculation of deuterium site occupancy in $LaNi_5D_{6.5}$, $LaNi_4AlD_{4.8}$ and $LaNi_4MnD_{5.9}$, 163
elastic constants and pressure derivatives of hexagonal lanthanum, 133

Lithium
tritium diffusion and trapping associted with lithium in Al–Li systems, 169

Magnesium
electronic structure of magnesium containing various alloying elements, 295

Magnetic properties
note on the formation and the magnetic properties of the compound $Nd_2Fe_{14}C$, L15
structure-sensitive magnetic properties of YFe_6Al_6, 321
the magnetic properties of $U_{1-x}Y_xS$ pseudobinary compounds, 241

Magnetic transformations
pressure effect on magnetic transformations in RE_2In (RE = Gd, Tb, Dy, Ho), L5

Milling
amorphous Ni–Zr powders by milling the crystalline alloys, 93

Molybdenum
diffusion paths and phase equilibria in the Mo–Ni–Cr system at 1425 K, 225
electron irradiation induced disordering of short-range ordered (Ti, Mo)C_x carbide, 309
short-range order in a (Ti, Mo)C_x carbide due to the metal–metal interaction, 235

Mössbauer spectroscopy
study of the influence of titanium on the Nd–Fe–Co–B magnetic phase by Mössbauer spectroscopic measurements between 100 and 650 K, 83

Neodymium
note on the formation and the magnetic properties of the compound $Nd_2Fe_{14}C$, L15
on the neodymium-rich phases in Nd–Fe–B magnets, 217
study of the influence of titanium on the Nd–Fe–Co–B magnetic phase by Mössbauer spectroscopic measurements between 100 and 650 K, 83

Nickel
amorphous Ni–Zr powders by milling the crystalline alloys, 93
a novel pattern of condensed tricapped trigonal prismatic clusters for $M_2Ta_{11}Se_8$ (M = Fe, Co, Ni), 59
atomic distribution of alloying additions between sublattices in the intermetallic compounds Ni_3Al and NiAl
II: microscopic calculations and X-ray diffraction analysis, 191
calculation of deuterium site occupancy in $LaNi_5D_{6.5}$, $LaNi_4AlD_{4.8}$ and $LaNi_4MnD_{5.9}$, 163
diffusion paths and phase equilibria in the Mo–Ni–Cr system at 1425 K, 225
investigation of the crystal structure of YNi_2, L1
structural phase transitions in $YCu_{1-x}M_x$ (M = Ni, Ag and Ga), 29
the solidus and liquidus lines in the Au–Ni phase diagram, L19

Niobium
thermotransport of hydrogen in niobium and tantalum as a function of concentration, 249

Nitriding
effect of nitriding on the surface structure of titanium, L11

Nuclear magnetic resonance
nuclear magnetic resonance and magnetization studies in $Ti_4Fe_2O_{0.4}H_x$, 177

Palladium
pressure–concentration isotherms of PdH_x thin films up to 0.2 GPa of gaseous hydrogen, 73
on the stability of the ordered Pd_8V phase in a proton-irradiated Pd–15at.%V alloy, 45

Phase diagram
phase diagram of the Pr–Sb system, L23
solidus and liquidus lines in the Au–Ni phase diagram, L19
Phosphor bronze plates
TiB_2 coatings on phosphor bronze plates by CVD and their properties, 327
Photoelectron spectroscopy
surface oxidation of holmium: UV photoelectron spectroscopy, X-ray photoelectron spectroscopy and scanning electron microscopy studies, 1
Potassium fluoride
liquidus surfaces of the $KF–B_2O_3–Li_2WO_4$, $KF–B_2O_3–Na_2WO_4$ and $KF–B_2O_3–K_2WO_4$ systems, 55
Praseodymium
phase diagram of the Pr–Sb system, L23
Proton irradiation
stability of the ordered Pd_8V phase in a proton-irradiated Pd–15at.%V alloy, 45

Rare earths
solid solubility of rare earths in aluminium, 213
Rhodium
topologies of $(M_{13})_{13}$ superclusters of ruthenium, rhodium and gold, 137
Ruthenium
topologies of $(M_{13})_{13}$ superclusters of ruthenium, rhodium and gold, 137

Scandium
crystal structure of $ScTaN_{1-x}$, 157
Scanning electron microscopy
surface oxidation of holmium: UV photoelectron spectroscopy, X-ray photoelectron spectroscopy and scanning electron microscopy studies, 1
Selenium
novel pattern of condensed tricapped trigonal prismatic clusters for $M_2Ta_{11}Se_8$ (M = Fe, Co, Ni), 59
Short-range order
electron irradiation induced disordering of short-range ordered (Ti, Mo)C_x carbide, 309
short-range order in a (Ti, Mo)C_x carbide due to the metal–metal interaction, 235
Silver
structural phase transitions in $YCu_{1-x}M_x$ (M = Ni, Ag and Ga), 29
Solid solubility
solid solubility of rare earths in aluminium, 213
Specific heat
low temperature specific heat of f.c.c. ytterbium hydrides, 207
Sulphur
magnetic properties of $U_{1-x}Y_xS$ pseudobinary compounds, 241
Surface structure
effect of nitriding on the surface structure of titanium, L11

Tantalum
a novel pattern of condensed tricapped trigonal prismatic clusters for $M_2Ta_{11}Se_8$ (M = Fe, Co, Ni), 59
crystal structure of $ScTaN_{1-x}$, 157
thermotransport of hydrogen in niobium and tantalum as a function of concentration, 249
Terbium
pressure effect on magnetic transformations in RE_2In (RE = Gd, Tb, Dy, Ho), L5
Thermal expansion
thermal expansion studies on the group IV–VII transition metal diborides, 145
Thermodynamics
thermodynamics of the $ErFe_2$–H system using differential heat conduction calorimetry, 103
Thin films
pressure–concentration isotherms of PdH_x thin films up to 0.2 GPa of gaseous hydrogen, 73
Thorium
low temperature properties of the new Heusler phase $UInAu_2$: magnetic to non-magnetic transition in (U, Y)$InAu_2$ and (U, Th)$InAu_2$, 121
Tin
thermodynamic properties of solid Ir–Sn alloys, 11
Titanium
effect of nitriding on the surface structure of titanium, L11
electron irradiation induced disordering of short-range ordered (Ti, Mo)C_x carbide, 309

internal stress in growing TiO_2 films, 335
nuclear magnetic resonance and magnetization studies in $Ti_4Fe_2O_{0.4}H_x$, 177
short-range order in a (Ti, Mo)C_x carbide due to the metal–metal interaction, 235
study of the influence of titanium on the Nd–Fe–Co–B magnetic phase by Mössbauer spectroscopic measurements between 100 and 650 K, 83

Titanium boride
TiB_2 coatings on phosphor bronze plates by CVD and their properties, 327

Transition metals
thermal expansion studies on the group IV–VII transition metal diborides, 145

Tritium diffusion
tritium diffusion and trapping associated with lithium in Al–Li systems, 169

Tungstate
liquidus surfaces of the $KF–B_2O_3–Li_2WO_4$, $KF–B_2O_3–Na_2WO_4$ and $KF–B_2O_3–K_2WO_4$ systems, 55

Uranium
low temperature properties of the new Heusler phase $UInAu_2$: magnetic to non-magnetic transition in (U, Y)$InAu_2$ and (U, Th)$InAu_2$, 121
on the structure types of UAu_2 and $U_{14}Au_{51}$, 261
the magnetic properties of $U_{1-x}Y_xS$ pseudobinary compounds, 241

Vanadium
stability of the ordered Pd_8V phase in a proton-irradiated Pd–15at.%V alloy, 45

X-ray diffraction
absorption spectrophotometric and X-ray diffraction studies of the trihalides of promethium in the solid state, 275
atomic distribution of alloying additions between sublattices in the intermetallic compounds Ni_3Al and NiAl
II: microscopic calculations and X-ray diffraction analysis, 191

Ytterbium
hydride formation and phase relations in the Yb–H system: a critical re-examination, 201
low temperature specific heat of f.c.c. ytterbium hydrides, 207

Yttrium
investigation of the crystal structure of YNi_2, L1
low temperature properties of the new Heusler phase $UInAu_2$: magnetic to non-magnetic transition in (U, Y)$InAu_2$ and (U, Th)$InAu_2$, 121
structural phase transitions in $YCu_{1-x}M_x$ (M = Ni, Ag and Ga), 29
structure-sensitive magnetic properties of YFe_6Al_6, 321
the magnetic properties of $U_{1-x}Y_xS$ pseudobinary compounds, 241

Zirconium
amorphous Ni–Zr powders by milling the crystalline alloys, 93
low-frequency internal friction study of Zr–H and Zr–D alloys, 285
